Quick Reference Instructions for INF0500-E

These instructions are not a substitute for the Instructions for Use. Be sure to read the INF0500-E Instructions for Use and Infinity Enteral Feeding Pump Operator’s Manual thoroughly prior to operating the pump.

If using a backpack

1. Hold the bag’s funnel upright and pour in feeding formula. Close cap tightly.
2. Unscrew the protective cover counterclockwise from the ENFit connector.
3. Loop the silicone tubing around the pump wheel stretching lightly. Seat cassette into the pump and close the door.
4. Screw the ENFit connector clockwise into feeding tube firmly by hand. Be careful not to overtighten.
5. Place the pump into the backpack and secure with straps.

If using an IV pole

1. Hold the bag’s funnel upright and pour in feeding formula. Close cap tightly and hang bag.
2. Unscrew the protective cover counterclockwise from the ENFit connector.
3. If manually priming, skip to step 6. If using the pump to prime, continue through step 5.
4. Turn pump on by pressing and holding the ON/OFF key until the pump beeps. Then, press and hold the PRIME key until formula reaches the feeding tube connector.
5. Screw the ENFit connector clockwise into feeding tube firmly by hand. Be careful not to overtighten.
6. To manually prime, gently pinch teal colored tubing below the "O" symbol. While pinching, gently squeeze the bag at the same time to assist fluid flow. Hold this position until formula reaches the feeding tube connector.

When primed, refer to steps 3 and 4 to load the set into the pump and connect set to the feeding tube.
